DESERT RHINO ADVENTURE

The attraction of Damaraland lies in its wealth of geological features, Bushman paintings and engravings, Elephants that live in the desert, and black Rhinos and in the rugged and colourful beauty of its landscape. Moving inland from the dunes and plains of the bleak Skeleton Coast, the terrain gradually rises through wild desert mountains towards the scrubby plateaus of central Namibia. It is through this untamed, beautiful land that Africa Motion Tours offer eco-friendly quad bike experiences with a difference.

The conditions of the roads and tracks make the itinerary a Grade 1. A combination of camping and lodge accommodation is done during this itinerary and it is ideal for the reasonable adventurous person.
